4 Courses

Introduction to Process Safety and Risk Analysis

Chemical Hazards: Toxicology & Reactivity

Predictive Models for Toxic Chemical Releases

Fire and Explosion Hazards Analysis

Oct 5, 2026

Hanzala Chaudary

has successfully completed the online Specialization

Chemical Hazards and Process Safety

In this Specialization, learners developed and honed essential skills in chemical hazards and process safety, including being able to evaluate potential process hazards and their consequences. The Specialization focused on considerations of health, environmental, and social impacts of process safety and design and build the skills necessary for learners to determine key measures related to chemical dispersion, fires, and explosions. Learners completed try it problems to help design aspects of pressure relief, flare, and other mitigation systems.

Jason R. White,
Associate Professor of Teaching Chemical Engineering,
Department of Chemical Engineering

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
